TOWING MIRRORS

THE BEST LOOKING TOWING MIRRORS AVAILABLE!

MSA 4X4's patented, SEMA award-winning Towing Mirrors feature a large single mirror that pivots on a heavy-duty extension slide. Allowing the mirror to extend out when towing and return to a normal driving position, when not towing.

Government guidelines state that the driver is required to see 20m past the widest point of the towed vehicle. MSA 4X4 has created a range of Towing Mirrors that meet this guideline and are specifically designed for Australian towing vehicles.

The large single mirror lens creates less confusion and enhanced safety while driving. The four, easily adjustable positions, provide greater vision, with less vibration to any towing situation, while maintaining ADR compliance and safety. When the mirror is rotated into the horizontal position, the mirror's actuator automatically adapts, allowing for standard adjustments (up, down, side to side) from the vehicle's standard mirror controller. This caters to drivers of differing height and seated positions. Designed to fold inwards or outwards when bumped in car parks, or when contact is made with trees and other obstacles around the vehicle. Simple to fit. MSA 4X4's Towing Mirrors mount onto a vehicle door in the same position as the existing mirrors. Most factory mirror functions are retained and come with the choice of black or chrome.

Injection moulded and die cast aluminium components deliver a high-quality towing mirror to withstand Australian conditions. A great all-around mirror for towing caravans, trailers camper trailers, boats and horse floats. Available to suit a growing range of towing vehicles.

FEATURES

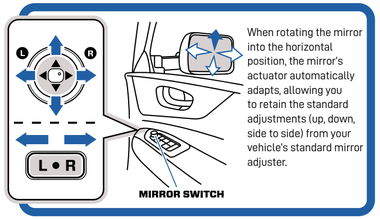

- Four different mirror positions
- Large, single mirror lens
- Adjustable viewing angles
- Vertical and horizontal adjustment
- Unique pivot design
- Fold inwards or outwards
- ADR Compliant.
- Injection moulded and die-cast aluminium components

INCLUDES

- MSA 4X4's 5 Year Warranty.

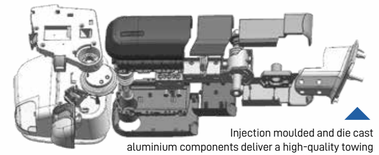

When extended the large, single mirror allows the driver to see beyond the caravan, trailer or boat and avoids the confusion of multi-lens mirrors for everyday driving.

MIRROR SWITCH

When rotating the mirror into the horizontal position, the mirror's actuator automatically adapts, allowing you to retain the standard adjustments (up, down, side to side) from your vehicle's standard mirror adjuster.

Injection moulded and die cast aluminium components deliver a high-quality towing mirror to withstand Australian conditions!

Designed to fold inwards or outwards when bumped in carparks or when in contact with trees and other obstacles around the vehicle.

TOWING MIRROR EXTENSION INFILLS

The MSA 4X4 Towing Mirror Extension Infills are designed to fill the space created when the MSA 4X4 Towing Mirror is left in the extended position.

In a situation where a wide service body is on the vehicle, standard manufacturer's mirrors can make vision difficult, extendable mirrors become essential. Leaving the MSA 4X4 Towing Mirrors in their extended position full time gives the vision required and using the Extention Infills provides a neat, flush and tidy finish for the vehicle.

QUICK & EASY FITMENT!
